PROFESSIONAL SUMMARY

Full-Stack Developer with production experience building and deploying enterprise-grade SaaS applications. Designed and shipped a multi-tenant School Management Platform (Vidhya Sathi) covering 15+ modules, deployed on Google Cloud Platform with an automated CI/CD pipeline. Strong expertise in Java/Spring Boot backend architecture, React frontend development, REST API design, Spring Security (JWT), Redis caching, Docker containerization, and third-party cloud integrations (AWS S3, Azure, WhatsApp Meta API).

TECHNICAL SKILLS

Backend	Java 21, Spring Boot 3.4, Spring Security, Hibernate, REST API, Redis, Liquibase	**Frontend**	React 19, Vite, TailwindCSS v4, TanStack Query, React Router v7, Axios
Database	MySQL 8+, Multi-Tenant DB Design, JPA/Hibernate ORM	**DevOps**	Docker, Nginx, GCP, GitHub Actions, CI/CD Pipelines
Security	JWT Authentication, Role-Based Access Control, Permission Systems	**Integrations**	AWS S3, MinIO, Azure Blob, GCS, WhatsApp Meta API, SMS, SMTP/SES
Tools	Git, GitHub, Maven, Postman, VS Code, IntelliJ IDEA	**Testing**	JUnit 5, Mockito

WORK EXPERIENCE

Junior Software Developer

Aug 2025 – Present
Full-time

Global Talent Resources LLC · Hyderabad, Telangana

- Developing and maintaining full-stack features using Java, Spring Boot (backend) and React 19 (frontend)
- Designing RESTful APIs with Spring Security, JWT authentication, and granular role-based access control
- Managing cloud deployments on Google Cloud Platform with automated CI/CD pipeline via GitHub Actions
- Integrating third-party services: AWS S3, MinIO, Azure Blob, WhatsApp Meta Cloud API, Email/SMS providers
- Containerizing applications with Docker and Nginx for production deployments
- Collaborating on database design with MySQL, Hibernate ORM, and Liquibase-managed migrations

Freelance Full-Stack Developer

Mar 2025 – Sep 2025
Freelance

Self-Employed

- Designed and developed a full-stack Electricity Billing web application independently from scratch
- Built separate admin and user panels with role-based access control using Spring Boot and HTML/CSS/JS
- Integrated MySQL database with Excel data import and automated PDF bill generation using iText/lowagie
- Managed end-to-end deployment including hosting configuration and domain setup

`Java` `Spring Boot` `MySQL` `HTML/CSS/JS` `PDF Generation` `Deployment`

KEY PROJECT

Vidhya Sathi — Multi-Tenant School Management SaaS

2025 – 2026

Full-Stack · Production Deployed · Google Cloud Platform | 🔗 Live Demo · GitHub

- Architected a **multi-tenant SaaS backend** with isolated Database-per-Tenant design and dynamic HikariCP routing — each school gets its own secure database

- Built **40+ REST API endpoints** across Academics, Core, and Master modules using Spring Boot 3.4 + Java 21
- Implemented **JWT-based authentication** with role & permission-based access control using Spring Security
- Integrated **6 file storage providers**: AWS S3, MinIO, Azure Blob Storage, GCS, Google Drive, Local — all switchable from UI
- Integrated **notification services**: Email (SMTP/AWS SES), SMS, WhatsApp (Meta Cloud API)
- Built **React 19 frontend** with Vite + TailwindCSS v4 covering 15+ functional modules and 100+ components
- Added **Redis caching**, full entity-level **audit logging**, and Liquibase DB migration management
- **Dockerized** backend (Spring Boot) + frontend (React + Nginx) and deployed on **Google Cloud Platform (GCP)** with automated **CI/CD pipeline** via GitHub Actions

🔑 **Demo Credentials:** Email: `sajid@star.in` · Password: `sajid123`

Java 21 | Spring Boot 3.4 | React 19 | MySQL | Redis | Docker | GCP | CI/CD | JWT | Spring Security | TailwindCSS | AWS S3 | WhatsApp Meta API | Nginx | Liquibase

EDUCATION

Bachelor of Computer Applications (BCA) — Information Technology
Manipal University Jaipur
Apr 2023 – Apr 2026
Jaipur, Rajasthan

CERTIFICATIONS

React.js — Internshala

Full Stack Web Development — Physics Wallah (PW Skills)

Internship & Job Preparation — Internshala Trainings
